

CARBON DIOXIDE (CO₂)

GAS CYLINDERS

SAFETY GUIDELINES

INTENDED USE: Beverage carbonation only.

WARNING:

- Contains food grade carbon dioxide gas under pressure.
- Carbon dioxide is an asphyxiant [i.e. can cause suffocation which can lead to possible brain damage or death.]
- Carbon dioxide can cause frostbite if allowed to escape cylinder rapidly.
- Carbon dioxide cylinder can explode if it becomes too hot.

DO

- ✓ Handle with care.
- ✓ Avoid eye and skin contact.
- ✓ Store below 45°C, in a secure area, upright and restrained to prevent from falling.
- ✓ Store and use in dry, well-ventilated area, away from areas of heavy traffic and emergency exits.
- ✓ Inspect for damages. If damaged, return to supplier.
- ✓ Check for leaks. If leaking, close the cylinder valve. If leaking does not stop, take the cylinder to a safe place in the open and empty it carefully. If unable to take cylinder into the open, evacuate area, lock room and ventilate. Inform supplier of leak.
- ✓ Point valve outlet away from you before opening valve slowly to prevent rapid decompression.
- ✓ Carry cylinders securely in open vehicles, if possible.

DON'T

- ✗ Drag, drop, slide, roll or act carelessly around the gas cylinder.
- ✗ Handle with wet hands.
- ✗ Store in direct sunlight, near steam or other sources of heat.
- ✗ Accept cylinder if it has dirty, rusted or damaged valves.
- ✗ Keep in damp, corrosive atmosphere.
- ✗ Use excessive force when opening or closing the valve.
- ✗ Carry in closed vehicles without adequate ventilation.
- ✗ Use cylinder if unsure of its condition [damage, burn, dents].
- ✗ Store full and empty cylinders together.

SET UP:

1. Place the CO₂ bottle in the bracket at the back of the Kegerator, or on the floor.
2. Bring the CO₂ regulator near the CO₂ bottle and tighten the nut securely with a wrench.
3. Open the CO₂ bottle to maximum and regulate the pressure by adjusting the knob on the regulator.
4. Refill your empty CO₂ bottle in an approved filling station.

BREWING.
OUR OBSESSION.
